

## DEPARTMENT OF FINANCE BILL ANALYSIS

**AMENDMENT DATE:** May 19, 2011  
**POSITION:** Neutral, note concerns

**BILL NUMBER:** AB 376  
**AUTHOR:** P. Fong

### **BILL SUMMARY:** Shark Fins

Existing law prohibits possession of any bird, mammal, fish, reptile, or amphibian taken in violation of the provisions of the Fish and Game Code. This bill would make it unlawful for any person to possess, sell, trade, or distribute a shark fin. The bill would allow restaurants that possess shark fin prior to January 1, 2012, to offer the fin for consumption by January 1, 2013.

### **FISCAL SUMMARY**

The Department of Fish and Game (DFG) is unable to estimate the number of law enforcement incidents that would result from banning the possession of shark fins. However, DFG estimates a cost of \$150 to \$2,000 per investigation of potential local markets that may supply shark fins, and a cost of \$30,000 to \$150,000 per investigation for potential recreational fishing groups that supply shark fins. To the extent that a budget augmentation to support additional DFG wardens and other enforcement resources is not provided, DFG would need to prioritize the ban on shark fins within its existing resources that are currently dedicated to the enforcement of other laws and regulations.

Under Section 6(b) of Article XIII B of the California Constitution, any costs to a unit of local government which result from legislation defining a new crime or changing an existing definition of a crime are not reimbursable by the state. In addition, Section 17556(g) of the Government Code provides that the Commission on State Mandates shall not find a reimbursable mandate in such legislation which eliminated a crime or changed the penalty for a crime. Therefore, any local government costs resulting from the mandate in this measure would not be state-reimbursable, because the mandate only involves the definition of a crime.

### **COMMENTS**

Finance is neutral on this bill. However, we are concerned that this bill would expand the number of laws and regulations that DFG wardens are responsible for enforcing. Without additional funding, DFG's enforcement of the shark fin ban could come at the expense of enforcing other laws and regulations.

It is widely believed that sharks are critical to the health and balance of the ocean ecosystem and that their extinction would adversely affect the biodiversity of the oceans of the world. Demand for shark fin drives overfishing of sharks and has contributed significantly to recent shark population declines. Some species have been depleted by as much as 90 percent and over one-third of shark species are threatened. According to the National Oceanic and Atmospheric Association, most sharks are vulnerable to overfishing because they have long life spans, take many years to mature, and only have a few young at a time. Consequently, recovery from overfishing can take years or decades for many shark species.

We note that Chapter 371, Statutes of 1995 (SB 458, Beverly) made it unlawful to sell, purchase, possess or deliver for commercial purposes on any commercial fishing vessel any shark fin or tail that has been removed from the carcass. This bill would apply these restrictions to individuals. However, the bill would allow shark fin possession consistent with specified licenses or permits.
